PROFESSIONAL SUMMARY

Full Stack Developer with **1+ years** production experience building **SaaS, B2B, and Real Estate** applications using **React.js, Next.js, Node.js, Express.js, Django, PostgreSQL, MongoDB, and Redis**. Specialized in **REST APIs, performance optimization, caching, multi-tenant architecture, RBAC, and database transactions** with proven results (**7-9s to 300-800ms** latency reduction, **1-20ms** cache hits, and **84% payload compression**).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java

Frontend: React.js, Next.js, Redux, Tailwind CSS, TanStack Query

Backend: Node.js, Express.js, Django, Django REST Framework (DRF), REST APIs, JWT Authentication, RBAC

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis

DevOps & Tools: Git, GitHub Actions, Docker, Vercel, Render, AWS S3, Cloudinary, Cloudflare R2

WORK EXPERIENCE

Param Divya | Full Stack Developer | Gandhinagar, Gujarat | Jul 2025 – Present

Selected Projects

[acrspace.com](#) – Multi-Tenant SaaS Inventory, POS & Billing Platform | Next.js, React.js, Node.js, Express.js, MongoDB, Redis

- Designed a multi-tenant, multi-warehouse SaaS POS and inventory platform with strict tenant data isolation and **Role-Based Access Control (RBAC)** across **50+ protected API routes** with **5 permission tiers**.
- Engineered an **ACID-compliant checkout pipeline** using **MongoDB transactions** for split payments and **atomic stock updates**, preventing overselling across sales, returns, and transfers.
- Cut REST API response times from **7-9s to 300-800ms** through **query optimization** and a **dual-layer Redis + LRU cache**, serving repeated requests in **1-20ms**.
- Optimized the **POS frontend** for **real-time multi-device synchronization** using client-side caching and asynchronous stock updates, keeping inventory and order state consistent across devices.
- Integrated **Razorpay subscriptions** with **HMAC-verified, idempotent webhook processing** for reliable billing lifecycle management.

[paramdivya.com](#) – B2B Premium Timber Import & Custom Woodwork Platform | Next.js, React.js, Django REST Framework, PostgreSQL, Redis, Cloudinary

- Developed advanced product discovery capabilities with multi-dimensional filtering across timber species, grade, drying type, origin, dimensions, and product forms.
- Reduced product search and catalog REST API response times from **5-6s to 200-620ms** through PostgreSQL query optimization, GIN indexing, trigram fuzzy matching, N+1 query elimination and Redis caching (**1-5ms hits**).
- Built a **direct-to-cloud image pipeline** with client-side WebP compression and Sharp asset optimization, reducing total frontend network payload from **60.8MB to 9.7MB (84% reduction)**.

[housingwaala.com](#) – Real Estate Platform | Next.js, React.js, Django REST Framework, PostgreSQL, Redis

- Reduced property listing REST API latency from **6-8s to 500-700ms** by implementing selective field projections and deferred ORM model hydration.
- Optimized multi-table property detail queries from **9-12s to 0.7-1.5s** using `prefetch_related`, `select_related`, and PostgreSQL relationship indexing.
- Implemented a **dual-layer Redis + TanStack Query caching** system with event-driven invalidation, bringing repeat requests under **20ms**.

EDUCATION

MCA, LJ University (2023-2025) | BCA, Gujarat University (2020-2023)
